### MOTIVATIEBRIEF KANDIDATUUR BAPA BOARD

---

4/02/2022

Dear,

I'm working at the hospital of Ziekenhuis Oost-Limburg at the department of critical care, existing of the departments of Anesthesia, Intensive Care and Emergency. In this department I'm responsible for the pediatric patients. This means that I take care of the protocols, deliberate procedures with the colleagues of surgery and pediatrics, and give training to the nursing department and trainees. As preparation for this responsibility I went for 1 year internship to the Great Ormond Street Hospital for Sick children at London, England.

With this function at a bigger regional hospital and with this foreign experience is it for me also very important to take part in the professional activities outside the hospital and do I follow specific courses and congresses to stay up to date. To me is it important to train (young) colleagues and to make their training as good and complete as possible so the children get the best treatment. For this I take my commitment now for 6 years in the BAPA to help organise the trainingsprogram.

I would like to continue to engage me for the improvement of the critical care for the most vulnerable and smallest of all our patients.

Your Sincerely  
Dr Joris Vundelinckxve Care – Emergency  
Ziekenhuis Oost-Limburg
